## DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

## Report on

## 'First-Year Orientation Gathering'

On September 11, 2023, a vibrant First-Year Orientation Gathering was organized for 115 students newly enrolled in the Computer Science and Engineering (CSE) department. The event commenced with a warm welcome by faculty members and senior students, creating an inclusive atmosphere for the incoming students. The Head of the Department (HOD) took the stage to provide a comprehensive introduction to the department, outlining its vision, mission, and academic offerings. The HOD also presented the department's highlights, giving the first-year students valuable insights into their academic journey.

Adding a touch of cultural flair, the final-year students organized and conducted engaging cultural events during the gathering. These included entertaining performances such as singing, and a connection program aimed at fostering camaraderie among the students. The cultural events not only showcased the talent within the department but also helped create a sense of community among the students.

The First-Year Orientation Gathering served as an excellent platform for new students to acquaint themselves with the department's ethos, faculty members, and their peers. The combination of informative sessions by faculty and lively cultural events organized by senior students contributed to a positive and enthusiastic start to the academic year for the 115 first-year CSE students. Few First year students also participated and enjoyed the session.

**Introduction to the department by the HoD – Dr. S. Padmapriya**
