A.V.C. COLLEGE OF ENGINEERING

| Approved by AICTE, New Delhi || Affiliated to Anna University, Chennai | |Accredited by NBA (CSE, EEE, ECE & MECH) & NAAC with "A" Grade (3rd Cycle) | | An ISO 9001:2015 Certified Institution |

Mannampandal, Mayiladuthurai District, Tamil Nadu - 609 305.

AVCCE CHRONICLE

NEWS LETTER

(Quartely Issue: July - September 2025)

| Volume - 1 | Issue - 1 |

DIRECTOR MESSAGE

Dr. M. SENTHILMURUGAN, Ph.D., Director, A.V.C.College of Engineering.

Dear Students, Faculty, and Well-wishers, It gives me great pleasure to share my thoughts in this edition of our college newsletter "AVCCE CRONICLE". This publication reflects the dedication, creativity, and achievements of our academic community. Each page is a testament to the hard work of our students, the commitment of our faculty, and the collective spirit that drives our institution forward. In today's rapidly changing world, education must go beyond textbooks.

Our mission is to nurture young minds to think critically, innovate boldly, and act responsibly. We aim to equip our students not only with knowledge and skills but also with values and a sense of purpose that will guide them throughout their lives. I encourage every student to embrace curiosity, seek excellence, and participate both academic actively in and extracurricular pursuits. The experiences you gain here will shape your future and empower you to make meaningful contributions to society. My heartfelt appreciation goes to the editorial team for their tireless efforts in bringing this newsletter to life. May it continue to serve as a bridge connecting ideas, achievements, and aspirations within our college With warm regards and best wishes for continued success. community.

[Dr. M. SENTHILMURUGAN]

PRINCIPAL MESSAGE

Dr. P. BALASUBRAMANIAN, M.E.,Ph.D., Principal A.V.C. College of Engineering

Dear Students, Faculty, and Readers, It gives me immense pleasure to welcome you to this edition of our college newsletter "AVCCE CRONICLE". This platform reflects the vibrant academic life, creativity, and achievements of our students and staff. Each article, event, and accomplishment featured here showcases the spirit of innovation and excellence that defines our institution.

As a college community, we continue to strive toward holistic growth encouraging not only academic excellence but also personal development, leadership, and social responsibility. I am proud of our students who consistently push boundaries and our faculty who guide them with dedication and passion.

I encourage every student to make the most of the opportunities available, to learn, to participate, and to contribute meaningfully to society. Let us continue to uphold our shared values of integrity, collaboration, and lifelong learning. My heartfelt appreciation to the editorial team for their effort in bringing together this wonderful edition. May this newsletter continue to inspire and connect us all.

[Dr.P.BALASUBRAMANIAN]

JUILY – SIEPTIEMIBIER 2025

DEPARTMENT HIGHLIGHTS

S.No	Event / Activity	Date	Details / Outcome	Department
1.	Online FDP	25.08.2025 to 30.08.2025	100000/. fund received from AICTE ATAL FDP Schemes	EEE
2.	Completed Ph.D Viva Voce for two Research Scholars under the guidance of Dr. S. Vijayaraj, Head.MECH	01.09.2025 & 04.09.2025	Dr. R. Saravanan, Assistant Professor, Department of Mechanical Engineering, AVCCE and Dr. K.Vijayarajan, Assistant Professor, Department of Mechanical Engineering, AAMEC.	MECH
3.	ED BAZAAR 2025	11.09.2025 to 13.09.2025	Organized by Dept.of Management Studies and ED Cell	MBA
4.	Student Project	11.08.2025	The Project title Nitrate scanner for fruits and vegetables was selected by TNSCST under the guidance of Dr.S.Selvamuthukumaran,Profess or / MCA Fund Received 7500/	MCA
5.	Student Project	11.08.2025	The Project title IOT-enabled smart helmet for safer work and cycling- was selected by TNSCST under the guidance of Dr. T. Venkatesan Associate Professor /MCA .Fund Received 7500/	MCA
6.	Student Project	11.08.2025	The Project title Smart Agricultural Soil Moisture Monitoring System was selected by TNSCST under the guidance of Mr. S.SivakumarAssistant .Professor / MCA.Fund Received 7500/	MCA
7.	One Week Student Induction Programme For First Year B.E/B.Tech Degree Students	18.08.2025 to 22.08.2025	As per the direction of AICTE and Anna University, Chennai, the AVCCE has organized an one week. Student Induction Programme for First year B.E/B.TECH Degree students from 18.08.2025 to 22.08.2025.	S&H

STUDENT DEVELOPMENT ACTIVITIES

izer CIVIL	
noth 13.08.2025	1. Improved Problem-Solving Skills:
17.08.2025	Participants developed better logical reasoning, analytical thinking, and
24.08.2025	numerical ability.
	17.08.2025

				2. Enhanced Exam Readiness: The	
				training helped students prepare	
				effectively for competitive exams and	
				• •	
				placement tests.	
				3. Increased Confidence: Regular	
				practice and guidance boosted	
				participants' confidence in tackling	
				aptitude-based questions under time	
				constraints.	
			CSE		
2.	ICTACT.	Infosys	04.08.2025	33 - IV years trained in AI	
	Finishing School		to		
	for Employability		25.08.2025		
	"AI in Azure"				
3.	IBM Tech	Edunet	13.08.2025	117 - II years students actively	
	Programme	Foundation		participated Certificate tracking	
	LIOTO E		4460200	program.	
4.	VOIS Tech	Edunet	14.08.2025	119 - III years students actively	
	Programme	Foundation		participated certificate tracking	
5.	AI Skills	SHELL &	25.08.2025	program 6 Final years, Students actively	
٥.	ALSKIIIS	EDUNET	to	6 Final years, Students actively participated in machine learning,	
		EDUNEI	30.08.205,	Artificial Intelligence on Green skills	
			08.09.2025	and sustainability,.	
			to	and sustainaointy,.	
			12.09.2025		
6.	ED Bazaar	Dept. of MBA,	01.09.2025	40 students actively took part in the ED	
		AVCCE		Bazaar and showcased their products	
				for sale	
7.	Communication	AVCCE	22.09.2025,	III, IV Year. workshop on	
	English Training		23.09.2025,	communication and personality	
			27.09.2025	development.	
8.	Aptitude training	AVCCE	01.09.2025,	63 Final years - Students are trained	
			29.09.2025,	with aptitude skills.	
			30.09.2025		
			EEE		
9.	Employability	Naan	30.07.2025	A total of 33 second.year students	
	Skill Training	Mudhalvan	to	received training in communication

A Quantum Computing: The Next Frontier of Computational Power A.Sivagayathri¹

Department of Computer Science and Engineering, AVC College of Engineering,
Tamil Nadu, India
sivagayathri1911@gmail.com

Abstract- Quantum computing is an emerging computational paradigm that exploits the principles of quantum mechanics—such as superposition, entanglement, and quantum interference achieve performance levels unattainable by classical systems. By operating on qubits rather than conventional bits, quantum processors enable massively parallel computation and offer exponential or quadratic speedups for selected problem domains. This paper presents a comprehensive overview of quantum computational concepts, fundamental architectures, and breakthrough algorithms including Shor's and Grover's techniques. It further reviews the practical applications of quantum computing in cryptography, simulation, optimization, and machine learning while analyzing major technological challenges such as decoherence, error rates, and scalability constraints. The study highlights current NISQ.era capabilities and outlines the research trajectory toward fault.tolerant, large.scale quantum systems. The findings aim to support academic understanding and guide future exploration in advanced computational technologies.

Keywords: Quantum Computing, Qubits, Superposition, Entanglement, Quantum Algorithms, NISQ, Quantum Cryptography, Quantum Simulation, Fault.TolerantComputing..

1. Importance & Future Enhancement Scope

Quantum computing represents a significant leap forward in computational science, offering the ability to solve complex problems that exceed classical capabilities. The importance of this technology lies in its potential to transform cryptography, scientific simulation, artificial intelligence, optimization, and advanced materials research. By harnessing quantum properties, researchers can explore high dimensional problem spaces with unprecedented efficiency.

Scope of the Work

This paper has examined the technical foundations of quantum computing, core algorithms, applications, and existing limitations. It provides an academically structured reference for students, researchers, and practitioners seeking a deeper technical understanding of quantum technologies.

Importance of the Study

The study emphasizes how quantum computing will influence future industries, national security, pharmaceutical innovations, and large.scale scientific research. Understanding these systems now is essential for preparing secure infrastructures and next.generation computational models.

Future Enhancement Scope

Future advancements are expected in the following areas:

- Fault.tolerant quantum architectures with robust quantum error correction.
- Scalable qubit technologies including topological, photonic, and spin.based qubits.
- Hybrid quantum–classical models to accelerate AI, optimization, and simulation tasks.
- Quantum networking and distributed quantum computing for global scale entanglement.
- Post.quantum cryptography and quantum.secure communication to protect digital systems.
- Higher coherence times enabling deeper and more accurate quantum circuits.

As these advancements mature, quantum computing will progress from an experimental platform to a powerful, industry.ready computational technology

CARBON CAPTURING BUILDING

Dhivya Bharathi. S,Guna Priya. L, Harini. S, Divya. R (III IT)

Abstract

This project aims to design and develop carbon capturing buildings that can effectively reduce CO2 emissions and promote sustainable development. The goal is to create buildings that not only minimize their carbon footprint but also contribute to a cleaner environment.

Goals

The primary goals of carbon capturing buildings are:

To capture and utilize CO2 from the atmosphere.

To reduce greenhouse gas emissions and mitigate climate change.

To promote sustainable development and create a cleaner environment.

How it Works

Carbon capturing buildings use various technologies to capture CO2 from the atmosphere, including:

Carbon Capture Systems: These systems use chemical or physical processes to capture CO2 from the atmosphere.

Green Roofs: Green roofs can absorb CO2 through photosynthesis, reducing the building's carbon footprint.

Energy Efficient Systems: Energy efficient systems can reduce energy consumption and lower greenhouse gas emissions.

Technology Used

Carbon capturing buildings use a combination of the following technologies:

Carbon Capture Systems: These systems use chemical or physical processes to capture CO2 from the atmosphere.

Renewable Energy Systems: Renewable energy systems, such as solar or wind power, can reduce energy consumption and lower greenhouse gas emissions.

Energy.Efficient Systems: Energy.efficient systems can reduce energy consumption and lower greenhouse gas emissions.

Future Outlook

The future outlook for carbon capturing buildings is promising, with potential applications in various industries, including:

Architecture: Carbon capturing buildings can be designed to be aesthetically pleasing and functional.

Urban Planning: Carbon capturing buildings can be integrated into urban planning to create more sustainable cities.

Environmental Sustainability: Carbon capturing buildings can contribute to a cleaner environment and promote sustainable development.

Conclusion

Carbon capturing buildings have the potential to reduce greenhouse gas emissions and promote sustainable development. With its potential to capture and utilize CO2 from the atmosphere, carbon capturing buildings can contribute to a cleaner environment and a more sustainable future.

AI-Powered Personal Health Assistant for Real -Time Diagnosis and Preventative Healthcare, Suvarna Sri.R(IV IT)

Concept

Create an AI.powered personal health assistant that integrates seamlessly into daily life, utilizing multiple sensors and machine learning algorithms to provide real.time health diagnostics and preventative care suggestions. The assistant would leverage data from wearable devices, smart home technologies, genomic data, and medical records to provide proactive health management.

Key Features

Wearable Health Monitoring

A small, comfortable wearable device (e.g., a ring, wristband, or patch) that continuously tracks vital signs such as heart rate, blood oxygen levels, temperature, stress levels, sleep patterns, physical activity, blood glucose (for diabetic users), and other biomarkers.

These sensors could detect early warning signs of conditions like heart attacks, stroke, diabetes, or respiratory issues.

Real Time Diagnostics

The AI would use deep learning algorithms to analyze real.time data from the sensors to detect abnormalities. For example, if the system detects an unusual pattern in heart rate or blood pressure, it would notify the user of potential risks.

The system would use natural language processing (NLP) to understand spoken or written symptoms the user may report and suggest possible diagnoses, based on medical databases and ongoing research.

Integrating Genomic Data

Users could input their genomic information (perhaps from genetic testing companies) into the system. By analyzing genetic predispositions, the AI could make personalized recommendations for lifestyle changes or preventative measures (e.g., adjusting diet, exercise, or medications based on genetic risk factors for conditions like cancer, Alzheimer's, or cardiovascular disease).

Virtual Health Assistant

A virtual health assistant (accessible via a smartphone, voice assistant, or augmented reality glasses) could provide real.time health insights and answers. For example, the assistant could remind users to take medications, guide them through specific exercises, or even suggest breathing techniques when stress levels are high.

Quantum Optimized Traffic Routing System -D. Vedika III IT B

Abstract

As urban areas become more congested, optimizing traffic flow in real.time is increasingly difficult for classical systems due to the complexity and scale of data involved. This project explores how "quantum computing can revolutionize traffic management" using quantum optimization algorithms like the "Quantum Approximate Optimization Algorithm (QAOA)" or "Grover's algorithm"

Goal

Develop a prototype traffic routing system that uses quantum algorithms to optimize the flow of vehicles across a smart city grid in real time.

How it works

Model intersections and road segments as a graph.

Define constraints such as traffic density, accident zones, and signal timing.

Use quantum algorithms to find the optimal routes that reduce congestion and travel time

Objective

To develop a traffic routing system that leverages "quantum computing" to optimize traffic flow in urban environments, minimizing congestion, travel time, and fuel consumption

Technologies Used

Quantum Frameworks: Qiskit, D. Wave Ocean SDK

Classical Tools: Python, NetworkX, TensorFlow (for traffic prediction)

Simulators: SUMO, MATSim

Data Platforms: Apache Kafka (streaming), PostgreSQL, GIS systems

APIs: Google Maps API, OpenStreetMap, traffic APIs

Expected Outcomes

Reduction in average travel time and congestion levels. More efficient fuel usage and lower emissions. Aproof. of. concept for integrating quantum computing in real. worldapplications. A scalable architecture for future smart city initiatives.

Conclusion

Quantum computing is more than just a technological advancement, it represents a fundamental shift in how we understand and harness the power of computation. By leveraging the peculiar properties of quantum mechanics, quantum computers promise to solve problems that are currently beyond reach, opening new frontiers in science, technology, and society. While obstacles remain, the potential benefits are vast, making quantum computing one of the most exciting and transformative fields of the 21st century.
