# DEPARTMENT OF CIVIL ENGINEERING

## CEAT

**Civil Engineering Advanced Technologies**

### HoD's message

Medical professionals are on the front liners in the fight against COVID-19, as they care for patients and work to create 'vaccine'. There unprecedented times have left over professionals, including Engineering's, wondering what they can do? How can engineers contribute to help society through this pandemic?

Civil and Environmental Engineering is uniquely positioned to respond to the many ordered effects of a pandemic virus. Hence our research is focused on the interconnected topics of the environmental health, civil infrastructure security, and sustainable resources engineering. Future building may require new designs that facilitate social distancing.

**Original name of the temple : Peruvudaiyar Kovil, Thanjavur**

The temple also called as Brihadishvara temple, Rajarajeswaram, is a Hindu temple dedicated to Shiva located in South bank of Cauvery river in Thanjavur, Tamil Nadu, India. It is one of the largest South Indian temples and an exemplary example of a fully realized Tamil architecture. Built by Tamil king Raja Raja Chola I between 1003 and 1010 AD, the temple is a part of the UNESCO World Heritage Site known as the "Great Living Chola Temples", along with the Chola dynasty era Gangaikonda Cholapuram temple and Airavatesvara temple that are about 70 kilometers (43 mi) and 40 kilometers (25 mi) to its northeast respectively.

Built out of granite, the vimana tower above the shrine is one of the tallest in South India. The temple has a massive colonnaded prakara (corridor) and one of the largest Shiva lingas in India. It is also famed for the quality of its sculpture, as well as being the location that commissioned the brass Nataraja – Shiva as the lord of dance, in 11th century. The complex includes shrines of Nandi, Parvati, Kartikeya, Ganesha, Sabhapati, Dakshinamurti, Chandeshvara, Varahi and others. The temple is one of the most visited tourist attractions in Tamil Nadu
